

Centralization of Control Rooms at MOL Group DS Facilities

KOVÁCS István

MOL Group DS Production T & D

i9kovacs@mol.hu

MOL Group Downstream has 4 refineries and 2 petrochemical plants within Central Eastern Europe. At these sites there are heavily distributed locations of process control there are sites with 12+ or even 20 localized control rooms. Recognizing of the advantages of Control Room Centralization, there is a MOL Group Level program has been initiated to achieve the benefits of it. The presentation will highlight the following main aspects of the philosophy behind this initiative:

- Why is the Control Room Consolidation is quite popular in the process industry?
- What are the MOL Group's expectations about the program?
- Should we change our operation philosophy?
- Preconditions, Challenges
- Journey & anticipated program milestones
