

BEREZNAI, Gábor

MOL Nyrt.

Head of Maintenance Engineering MOL

gbereznai@mol.hu

Gábor Bereznai is head of the Maintenance Engineering at the MOL Danube Refinery in Százhalombatta. He holds an Automation Engineer (BSc) degree from KKVMF Budapest and an Environmental Engineer (BSc) degree from Széchenyi University in Győr. He is also a TÜV Functional Safety engineer. He began his career at MOL in 1998 as a process analytical engineer in the Instrumentation and Control Department. He later joined the newly-formed Engineering Supervision Department as a process control specialist. He has worked on several major MOL projects including ultra-low sulphur motor fuel production, SIL, ATEX and maintenance system development. He also worked as a technical advisor to MOL Group Maintenance Management assisting in the development of PdM and PM systems and RCM.
