

KERESZTESI, Kálmán
Controsys Control Engineering Ltd.
Manager
Kalman.keresztesi@controsys.hu

Mr. Kálmán Keresztesi is manager and part owner of CONTROSYS Control Engineering Ltd. He has an Electrical Engineer degree at Budapest Technical University in 1984. His task is selection and distribution state of the art process control, automation systems and the related products in Hungary and - by completing successful applications - to set up long term customer partnerships. Several process control and SCADA projects had been delivered by Kalman and his application team over the past 25 years. Next to the multiple CitectSCADA based projects, 3 generations of ABB DCS systems were used mostly in chemical and pharmaceutical areas in Hungary as well as on abroad. Kálmán has been actively working on all fields of the applications. Most recent area of interest is computer based Application Lifecycle Management.
