

Prof. Dr. POCAJT, Viktor
Key to Metals AG

Founder

v.pocajt@keytometals.com

After starting as an engineer in the metal working industry, in the early 90's he got involved in IT development, applied computing and consulting. He managed the implementation of a number of e-business solutions, specialized Web-based software systems and databases for the global metal working and manufacturing industry. In the late 90's, he initiated the development of Total Materia, now the worldwide leading platform for material properties, and became the founder of Key to Metals AG. He is currently in charge for development and strategic projects.

Viktor holds BSc in Mechanical and in Chemical Engineering, MBA and PhD in applied computing.
