Dream Report – world best-in-class reporting and dashboarding for industrial automation

Dream Report is taming that ocean of data! It's the first programming free, user-friendly, automated reporting and data analysis software designed specifically for industrial automation applications. It is designed to be the simplest solution for extracting data from virtually any data source and Dream Report will provide automated reports to anybody, anywhere and anytime. Dream Report is our primary product, and we're always rebuilding it, making it better than it was before. Better, Stronger, Faster. Dream Report version 5.0 is another example of major improvement in all areas and making best use of the latest technologies. Dream Report version 5 is a big step, with all of its new features and we're sure you will love it. World most recommended, user friendly, web-based, 3-in-1 reporting and dashboarding solution for industrial automation for non-programming users. Perfectly integrated with Rockwell Automation products (PLCs, SCADA, Historian), Dream Report enables to build compliance, performance, ad-hoc reports without any single line of code, automatically or manually generate, publish and distribute reports when needed, to those who need them, accessible from anywhere via a web browser.

Edvard Bournazian, Business Development Manager Europe at Ocean Data Systems, has 15 years' experience in automation, SCADA systems, and industrial engineering. Edvard shares his expertise with our customers, distributors and system integrators, to understand their specific information needs, and to help them implement the best possible reporting solutions. As an integrator, he has implemented many successful reporting projects, since the early days of Dream Report. And now as a part of Ocean Data Systems' sales team, Ed is excited to share with you the many benefits of implementing a Dream Report solution, and the extensive set of new features in Dream Report 5.0.
