Comparison of printed versus dynamic instructions

On behalf of Desoutter Eastern Europe, we would like to invite you workshop focused on demonstrating the benefits of dynamic instructions with usage of smart peripherals. Participants will have the option to test and evaluate system used by major producers such as Toyota, JLR, Siemens, Dana Manufacturing, Deutsche Bahn or Poclairn Hydraulics. Participants would have the option not only to step into operator's shoes, but also the test the upper layer of the system providing statistical data.

Facilitator of the workshop has 12 years of experiences from the industrial field and is focused on Industry 4.0 subject and digitalization of production facilities.
