Why & How Digitization should Support Industry?

Nowadays the industry players in most of the countries are facing with same challenges like

- *Why energy cost Control and Management are crucial*
- *Who will done jobs - Lack of Human recourse*
- *Process vs Digitization - How to approach*

I would like to discuss why these challenges are so painful and urgent in my opinion, and so important find solutions to remain copetitiveness.

Tibor Farkas has 23 years experience at Multinational Companies like ABB, Honeywell and Schneider Electric mostly at Process Automation area.

He is familiar with from field instrumentation up to advanced solutions thanks to projects he led.

Recently he belives that one of the keys „How do you convert your Data to Information”
